ACADEMY

Now go make something unmissable.

You have the assets. The next step is the craft — thumbnails that earn the click and visuals people stop scrolling for.

SAVE, DON'T STREAM

Add the Drive folders to your own account first. That way your library stays available even if you're working offline.

BUILD A SYSTEM, NOT A FOLDER

Pick 5–10 packs you'll actually use — fonts, textures, light leaks, 3D elements — and turn them into reusable templates.

CONSISTENCY BEATS VARIETY

One recognisable thumbnail style across a channel outperforms a hundred one-off designs.
